ImageAnalysis delivers comprehensive services and innovative software algorithms for advanced medical imaging analytics.

Our proprietary platform Dynamika provides automation, centralization and standardization for imaging-based cardio-vascular clinical studies.

Expertise:

- ▶ **Automated analysis of inflammation** in dynamic perfusion scans of the heart
- ▶ **Identification and standardization** of advanced imaging biomarkers
- ▶ **3D visualization and quantification** of cardiac MRI

Service:

- ▶ Quantitative image analysis in support of imaging research
- ▶ Bespoke development of algorithms for image quantification
- ▶ Standardized reporting and centralized image reading
