ImageAnalysis delivers comprehensive services and innovative software algorithms for advanced medical imaging analytics.

Our proprietary platform Dynamika provides automation, centralization and standardization for imaging-based clinical studies in:

- ▶ Multiple Sclerosis
- ▶ Inflammatory Lesions (Alzheimer's disease, Parkinson's disease)
- ▶ PML

Expertise:

- ▶ **Automated analysis of inflammatory lesions** in clinical and research studies
- ▶ **Identification and standardization** of advanced imaging biomarkers (MRI, DCE-MRI and fMRI)
- ▶ **Scientific support of prognostic decision-making** and assessment of drug effect in research studies

Service:

- ▶ Quantitative image analysis in support of imaging research
- ▶ Bespoke development of algorithms for image quantification
- ▶ Centralized analysis and standardized reporting of lesions with reproducible, sensitive and automated techniques
